

Endodontics Simplified

- Role of Endodontics in private practice
- Practice management in Endodontics
- Rational behind endodontic treatment
- Endodontic diagnosis : Conventional & advanced tools
 1. Pulpal & periapical disease
 2. Differential diagnosis of pulpal pain
 3. Endodontic emergencies
 4. Intentional Endodontics
- Armamentarium in Endodontics : Basic to advanced
- Dental materials in Endodontics (Irrigants & Intracranial medicaments)
- Role of drugs in Endodontics
- Endodontic radiology
- Instruments in Endodontics
 1. Hand piece
 2. Burs
 3. Manual instruments
 4. Rotary instruments
 5. Accessory armamentarium
 6. Sterilisation in Endodontics

- Role of L.A. in Endodontics
- Isolation techniques & Rubber dam
- Internal anatomy of individual teeth & its clinical significance
- Exercise on extracted teeth

1. Sectioning of individual tooth
2. Diagnostic radiograph
3. Access cavity preparation
4. Working length determination
5. Biomechanical preparation
6. Fitting of master GP cone
7. Obturation techniques

- Cold lateral condensation
- Warm vertical condensation
- Thermoplastic compaction
- Mono cone technique

- Restoration of endodontically treated teeth and role of coronal seal
- Problem solving in Endodontics
- Possible errors & their management
- Endodontic mishaps
- Retreatment Endodontics
- Success & failure in Endodontics
- Single sitting Endodontics V/S multiple sitting Endodontics
- Multidisciplinary approach in Endodontics
- Management of traumatic injuries in Endodontics
- Endodontic surgeries

1. Periapical curettage
2. Apicoectomy
3. Biopsy of periapical lesions
4. Root resection
5. Hemi section
6. Bicuspidisation
7. Repair of perforation

- Myths about periradicular surgery
- Management of blunderbuss
- Intentional replantation & transplantation
- Financials in Endodontics
- Legal aspects of Endodontics
- Live treatment on patients

National award winner, internationally acclaimed academician & speaker
